# The Buyer's Guide to High-Noise Environments

**Engineered for** superior communication  
in high-noise environments

**GN** Making Life Sound Better  
FOR 150 YEARS

## Productivity is important, no matter the environment

## How BlueParrott wireless Bluetooth® headsets can help address high-noise environments

### Work environments are becoming more demanding

Employees are expected to maintain a high level of productivity in the workplace. But if that workplace is a high-noise environment, then communication and collaboration with colleagues can prove difficult.

### Safety regulations in the workplace are getting tougher

Workers in high-noise environments are often faced with challenging regulations in the workplace, indicating that easy, hands-free group communication is of the utmost importance.

### Wireless benefits

Busy workers who need to talk to customers and colleagues within high-noise environments need an industry-leading, noise cancelling, wireless Bluetooth® headset for superior communication on-the-go.

### Boost customer satisfaction

For certain environments, workers will be customer facing and may need to know information to questions they can't answer themselves. Wireless headsets that have Push-to-Talk capabilities can help improve customer satisfaction more efficiently and discreetly.

### Integration with enterprise mobile devices

Adding BlueParrott voice capabilities to mobile device deployments drives hands-free collaboration and efficiency. BlueParrott headsets integrate seamlessly with a range of enterprise mobile devices and software. Our open SDK enables enterprises to build custom experiences for their solutions, excluding Microsoft Teams variants which come pre-programmed with access to Microsoft Teams Walkie Talkie.

### Noisy workplaces can hinder conversation quality

High-noise work environments can be intense. Working in close proximity to high-noise can be distracting and disruptive and therefore difficult to work on-the-go.

### Not just colleague interruptions

Most workers are faced with colleague interruptions in the workplace that impact productivity but workers in high-noise environments are also faced with interruptions from the equipment or their unconventional surroundings.

### Work better in complex environments

Wireless Bluetooth® headsets offer the mobility to complete tasks faster, using both hands to focus on the job or easily communicate with colleagues who sit in different departments.

### Choose BlueParrott

BlueParrott has been producing industry-leading sound solutions for almost 15 years, serving the professional driving community with the highest levels of noise cancellation, comfort and durability. Now BlueParrott brings this expertise to a new collection of work settings, engineering headsets with features that will enhance productivity in professional locales that require more than your standard office.

Please talk to your BlueParrott Account Manager or partner to see how your organization could benefit from moving to BlueParrott wireless headsets.

Did you know?

**81%** of workers state that noise and interruptions negatively impact their productivity.\*
